

Need a new UPS or upgrade but don't have the cash?

Consider backup power as a service!

Ease your mind and budget with one contract for mission critical backup power, monitoring, maintenance and emergency service!

CONTRACT YOUR CRITICAL BACK UP POWER FOR:

Capital Conservation – Preserve cash to use for expansion and growth within your business

Budgeting Simplicity – Equal monthly payments make budgeting simple and consistent

Latest Technology – Refresh technology on a regular basis

System Upgradability – Upgrade to a larger system without penalty

Peace of Mind – Your critical power system monitored & proactively maintained for you

Quick Delivery – Avoid the process for capital expense approval or signatures

WHAT YOU GET:

- Latest technology UPS
- 8-hour response time, 7 x 24 x 365
- Regular preventative maintenance on UPS and batteries, including faulty battery replacement
- All parts and service covered, no additional or hidden costs
- Only factory-authorized parts for service, no after-market parts of unknown quality or spec's

BENEFITS INCLUDE:

Easy to Plan – A single, monthly payment for hardware and services

Future Proof – Refresh hardware as technology advances; trade up if power needs increase

Eaton Predict Pulse™ – Experts remotely diagnose issues and expedite repairs ahead of failure

Highest Reliability – New equipment backed by ePower Network and OEM service

Expert Assistance – Contract with a Critical Power Specialist, not some financial entity

CONTRACT vs BUY

A UPS system as a service provides a quick infrastructure solution for a predictable monthly fee. The result is you can use your capital to expand and grow your business, while transforming what would otherwise be a large capital investment into a smooth, operational expense.

Buying a UPS system impacts cash, and is heavily scrutinized by directors, investor or owners. Operational expenses, in contrast, are expensed within the year and allow you to obtain backup power for your critical operations.

Call us to learn more about contracting your UPS system as a service – we are backup power experts for YOUR critical operations!
